At Covol Engineering, we bring over 45 years of international engineering experience to every project. Our highly skilled electrical engineering team is driven by a deep passion for innovation, progress, and precision. We pride ourselves on being more than just engineers. We are enablers of growth, supporting evolving industries through thoughtful design, detailed analysis, and cutting-edge solutions. With a forward-thinking mindset and a relentless pursuit of excellence, we continuously strive to deliver results that meet and exceed expectations. Our core strength lies in our deep-rooted expertise in Electrical Engineering, including detailed design and network analysis to ensure your electrical systems are safe.

reliable, and fit for purpose. We provide our clients with a comprehensive suite of studies to help understand their Electrical hazards including Arc Flash and Fault Level Assessments, Protection Coordination Studies, Earthing, and Power System Analyses and Electrical Technical Authority support. We deliver comprehensive HV and LV Design services covering new build and changes to existing distribution systems., and Electrical Technical Authority support. We are proactive problem solvers, ready to guide our clients from the earliest stages of concept and

compliance to final delivery. Website:
